

## CLAIMS

The embodiments of the invention in which I claim an exclusive property or privilege are defined as follows:

1. A method of delivering a package, said method comprising the steps of
  - placing said package in a case;
  - locking said case;
  - taking said case to a recipient of said package;
  - providing said recipient with an articulable basis upon which to believe that a recipient biometric is required to receive said package.
2. A method of fingerprinting a person, said method comprising the steps of designating said person as a package recipient, and delivering a package to said person using the method of claim 1.
3. A method of delivering a package, said method comprising the steps of
  - providing a carrier with said package;
  - providing said carrier with means for incidentalist picture capture;
  - sending live pictures of a recipient of said package to a remote facility.
4. A delivery system comprising:
  - a case for carrying a package;
  - a lock for said case;
  - means for constructing an articulable basis upon which a recipient may believe that a recipient biometric is required to receive said package.
5. A delivery system comprising:
  - a delivery uniform comprising a wearable computer system, said uniform also including an image capture system, said wearable computer system responsive to an output of said image capture system;
  - a wireless communications link to a remote facility;

- a server for connection to a sender of a package sent by said delivery system.
6. A vaccination facility comprising:
- an entrance to a facility;
  - a turnstile for allowing a person to enter said entrance but not leave from said entrance;
  - a vaccinator;
  - an exit operable only in response to the receiving of a vaccination from said vaccinator.
7. A suspect selector comprising
- an entrance to a facility;
  - a turnstile for allowing a person to enter said entrance but not leave from said entrance;
  - movable panels for said turnstile;
  - an exit operable only in response to the moving of at least one of said panels together with said turnstile.
8. A method of crowd control, said method comprising the steps of:
- spraying persons with a chemical contaminant;
  - offering said persons an opportunity to decontaminate themselves using a decontamination facility including the vaccination facility described in claim 6 or claim 7.
